# VPCOMPASS®

Energy monitoring simplified

The VPCompass® is a plug & play solution for efficiency monitoring of compressors and other industrial machinery. Combining a state-of-the art, real time monitoring engine with advanced analytics. The efficiency of your compressor is permanently monitored, and you will receive an alarm before things go out of hand.

- Touch screen
- Power supply
- RS485
- TCP/Ethernet
- USB/data export
- 2 Alarm relays

VPFlowScope **DP**

VPFlowScope **Probe/M**

Supply side
- Wet air
- High velocity

Dew point sensor

Demand side
- Dry air
- Low to medium velocity

Applications:

> Compressor efficiency monitoring
> Flow, pressure, temperature, dew point, kW, totalizer
> Condition monitoring & maintenance management
> Leakage management

Features:

> Connect up to 6 Modbus sensors and 2 analog to Ethernet converters
> KPI's, real time values and historic graphs
> Eternal data logger
> Alarms
